

Kris-Evan N'GUESSANT

Ottawa, ON | (438)-838-5342 | bnegue079@uottawa.ca | [Kris-ewan | LinkedIn](#) | github.com/kr1s3van

PROFESSIONAL SUMMARY

Software Engineering student at the University of Ottawa with hands-on experience in full-stack development. Proven ability to build responsive web applications using Next.js, Java, and Python. Skilled in cloud integration (AWS S3) and collaborative version control (Git). Seeking a co-op/internship opportunity to leverage technical problem-solving and leadership skills.

EDUCATION

University of Ottawa

Sep 2024 - Jun 2028

Bachelor of Applied Science, Software Engineering

Ottawa, ON

- **Achievements:** Admission Scholarship
- **Coursework:** Data Structures, Algorithms, Object-Oriented Programming, Software Design, Digital Systems

CODING PROJECTS

UTaste (Android) | [Live Demo](#)

2025

- Developed a centralized Android terminal for restaurant operations using Java and SQLite for local data persistence and architected and implemented the Waiter Module, enabling sales tracking with mandatory ratings, feedback systems, and real-time history visualization.
- Integrated the Volley API to fetch nutritional data from OpenFoodFacts.
- Authored comprehensive JUnit and Espresso test suites to validate core business logic, including ingredient management and calorie calculation accuracy.

Carte Canadienne | [Live Demo](#)

2025

- Collaborated on a responsive accessibility platform for people with disabilities using Next.js and Tailwind CSS.
- Engineered a secure Admin Authentication module and integrated AWS S3 for scalable cloud storage of platform assets.
- Optimized web performance using Next.js font optimization and server-side rendering (SSR) for improved SEO.

Sifflo | [Live Demo](#)

2026

- Developed a full-stack web application that transcribes whistling or humming into real-time musical notation.
- Implemented Digital Signal Processing (DSP) algorithms using Librosa and NumPy for precise pitch detection and frequency-to-note conversion and engineered a high-performance FastAPI backend to handle audio processing and a responsive React.js frontend with VexFlow for dynamic musical engraving.

UoBuddy | [Live Demo](#)

2026

- Co-developed a multi-agent AI engine using Google Gemini to intelligently match uOttawa students with career opportunities and clubs based on skills and academic interests.
- Architected a real-time, event-driven system using the Solace Event Bus and Python agents to ensure high performance message streaming and asynchronous data processing.
- Integrated Supabase for secure user authentication and real-time database management, delivering a functional full-stack solution within a high-pressure 24-hour hackathon deadline.

PROFESSIONAL EXPERIENCE

Tutorat Pro

Jun 2025 - Sep 2025

Academic Tutor

Gatineau, QC

- Provide 1-on-1 tutoring sessions in Mathematics and Computer Science to high school students using video conferencing and shared GitHub repositories, enabling students to practice coding and receive immediate feedback, which leads to clearer understanding and higher grades
- Translate complex algorithmic and mathematical concepts into simplified learning modules built with Node.js interactive examples and JUnit tests, allowing students to experiment with code and see results instantly, which improves their ability to solve similar problems independently
- Adapt teaching methods to individual student needs, resulting in improved academic performance and confidence.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript (ES6+), TypeScript, HTML5, CSS3, C, SQL
- **Frameworks & Libraries:** Next.js, React, Node.js, JUnit, Kivy
- **Tools & Cloud:** Git/GitHub, AWS S3, SQLite, Vercel, Android Studio, VS Code, Windows, Android
- **Concepts:** Object-Oriented Programming (OOP), Agile Methodology, Cloud Storage, UML Design, Responsive Design
